

"I have the opportunity to work with a number of prestigious clients"

Andreas – Graduate Electrical Engineer at Actemium

SNAPSHOT:

Name: Andreas Christodoulou – Graduate Electrical Engineer

Start date: September 2015

Qualifications: MSc Electrical Engineering, MEng/BEng Electrical & Electronic Engineering

WORK TIMES:

1 to 2 days a week on site at the BMW/Mini site
3 to 4 days a week at Actemium Birmingham

1) How did you become employed at VE UK & Rol?

Since graduating I worked as an Electrician & Electrical Design Engineer for a period of 12 months part time during university. I applied for the role as it was relevant and was granted an interview with the Business Unit General Manager, with my role reporting to the Electrical Sector Manager.

2) What are your missions as a graduate?

My week is split between the BMW/Mini plant (1 to 2 days a week) and the rest of the week in the office. My main responsibilities involve the process of Supplier Quotes (checks/logistics) with the Electrical Sector Manager and include changes in the quotations around the logistics if necessary.

The missions also include Purchase Orders, Completion Certificates with tests and operation manuals with a regular 6 month review occurring to evaluate my progress. Additionally I am also involved with technical drawings (AutoCAD) within various projects; this is an application that I really enjoy using within my role.

3) What do you enjoy most about your role?

The role enables me to see the process in practice; with my own work being showcased, again “theory into practice” within a technical project is a personal highlight. Working on site with trained electricians for prestigious clients, gives the factor of a mentor to learn from and expand my work experience.

4) What is your career ambition?

My ambition is to become a Project Engineer and stay within the automotive sector. In the long term progressing to become a Chartered Engineer with the IET (The Institution of Engineering and Technology).

Our business continues to develop and we are looking to attract new people who share our values of first class customer service and career development.
