

# About Us

## both global and local.

Omexom's work connecting the Ewe Hill windfarm in Scotland to the electricity grid has helped to provide clean, renewable energy to over 24,000 homes.

It's just one way we're using our global expertise to help local communities.

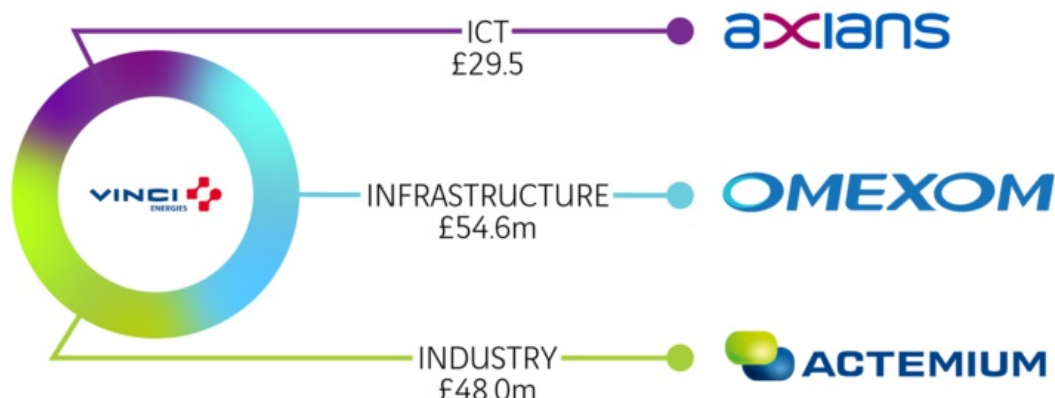

VINCI Energies UK & RoI deploys its fields of expertise in three business lines via three main brands: infrastructure (Omexom), industry (Actemium) and ICT (Axians). With strong regional roots and an agile organisational structure, our Business Units boost the reliability, safety and efficiency of energy, transport and communication infrastructure, factories, buildings and information systems.

Globally, we're a major player in a constantly changing world, working at the cross roads of society's most important issues of today and tomorrow. Locally, we've been operating in the UK for over 110 years. Lee Beesley, electrical contractors based in Coventry began trading in 1907 and their acquisition in 1991 by VINCI Energies marked the start of our presence in the UK.

We're a growing network of engineer-led, agile Business Units, each one autonomous and specialised to local customer and sector needs. They have the added advantage of being backed by VINCI Energies' global network of engineering expertise and specialists, strengthening the service they provide to customers.

**£132m**

**in 2018.**

offer it's customers value-added solutions at a local and national level with access to a powerful global network of experts.

Since the rebranding of Lee Beesley to Actemium in 2011, VINCI Energies has seen revenue growth of 528% to £132m in 2018. This growth is down to the acquisitions of great companies, the innovative way we run our business, and the entrepreneurial nature of our business units.

**autonomy.**  
**innovation.**  
**solidarity.**

In 2019, QSI Group LTD rebranded to Actemium Automation Teesside following a successful acquisition in 2017.

The move will allow them to better harness the power of the VINCI Energies global network.

VINCI Energies UK and RoI is a network of autonomous, entrepreneur led specialised business units, empowered to deliver and grow. Our UK success is built on this unique way of doing business where each unit is responsible for its own financial and business planning, marketing and strategy while working under the banner of one of VINCI Energies' business brands.

Every business we acquire maintains their management autonomy and with senior advice, strategy and planning, VINCI Energies UK & RoI is able to support these businesses in their growth – allowing them to combine their specialist local knowledge with the expertise of a global network.
