

Axians: Working at the heart of the digital transformation

Axians is the VINCI Energies brand dedicated to information and communications technology (ICT). The brand supports its customers – enterprises, the public sector, carriers and service providers – from IT infrastructure and services to digital transformation.

Axians

We build the best high performance networks for our digitally connected world

AXIANS

[Go to website](#)

Axians design, build, maintain, enhance and support carrier grade networks for Service Providers and leading Research & Education organisations in the UK and Globally. Networks designed by Axians enable clients to launch new products and services to market with total confidence and allow scalability to meet and exceed future demand.

Axians delivers secure and end-to-end core, edge and virtual solutions to deploy integrated, reliable, secure and cost-effective networks, offering a true mobility experience to end-users, regardless of where, when or how they access the network.

OUR SOLUTIONS

Axians long standing capabilities are perfectly placed to create innovative and forward thinking solutions that solve issues and demonstrate added value.
