

Our business lines

VINCI Energies deploys its fields of expertise in four business lines: infrastructure, industry, service sector and ICT.

Business Lines

VINCI Energies business units offer wide-ranging complementary expertise. In synergy with other business units, or locally, they can put together global solutions with high added value that are tailored to their customers' specific needs.

Acting as the interface between users and equipment suppliers, VINCI Energies provides design, implementation, maintenance and operation in four business lines:

- Industry
- Service sector
- Infrastructure
- Information and communication technologies
